

Web: Will my site be visible on Google?

Any site can be "visible" on Google (or any search engine) as long as it passes Google's (or other search company) site checking algorithm. The important thing is to ensure your site conforms to search engine standards AND then gets submitted for indexing by the search engine. KA Data Group will build your site with this capability and submit it for indexing with up to 26 major search engines around the world! This includes Google, Yahoo, and MSN, among others.
